Dayton Development Coalition
Priority Development and Advocacy Committee
1401 S Main St, Suite 200
Dayton, OH 45409

Dear Priority Development and Advocacy Committee,

On behalf of L-H Battery Company—the LG Energy Solution (LGES) and Honda joint venture battery plant—we are writing to express our support for the Village of Jeffersonville (VoJ) Water Program submission to the Dayton Development Coalition (DDC) Priority Development and Advocacy Committee (PDAC) vetting process.

Since announcing the decision to locate this \$3.5 billion manufacturing plant in Jeffersonville, our team has greatly appreciated the strong working relationship that we have had with the leaders of Jeffersonville as we prepare for the completion of construction in 2024 and start of mass production in 2025.

With the 2,200 jobs that this new operation will bring to the region, we are encouraged by our collaboration to date with area leaders on how we can grow together with the community and the new opportunities and amenities that could be available to residents and our future associates. Indeed, the VoJ Water Program will combine the resources of public and private partners to bring much-needed family housing to the community, which will support not just associates at our operations but all the other area employers that are so vital to Jeffersonville.

This VoJ Water Program will benefit the community in planning for health, education, job creation, and improved regional development, which will positively affect the quality of life of local residents and our associates. Accordingly, PDAC approval will allow this project to seek planning and design funds to move the project forward.

Please let us know if you have any questions regarding this letter or the details contained herein. And we greatly appreciate your consideration of the Village of Jeffersonville's Water Program application, as it will be an extremely beneficial undertaking not just for our future workforce, but for the State of Ohio and the Jeffersonville community we are so proud to now call home.

Thank you.

31 October 2023

Dear Reviewing Committee,

We are writing to express my support for the Village of Jeffersonville Water Program submission to the Dayton Development Coalition's (DDC) Priority Development and Advocacy Committee (PDAC) vetting process.

The DDC's PDAC vetting process seeks to establish regional priority for the funding of projects which, "benefit the economic development, health, education or quality of life in the region." The VoJ Water Program will combine the resources of public and private partners to bring much needed family housing to our community in support of the Honda/LG Project and multiple other investors that are committing to the Jeffersonville area.

In addition to economic development, this project will benefit the community in planning for health, education and job creation, and improved regional development which will positively affect the quality of life of local residents. The VoJ Water Program will combine the resources of public and private partners to bring an economic boost to our region. PDAC approval will allow this project to seek planning and design funds to move the project forward.

We would appreciate your consideration of this application as an extremely beneficial undertaking for the State of Ohio.

Thank you,

Daniel C. Dean
