Re: City of Union Water Tower

Dear Priority Development and Advocacy Committee:

The purpose of this letter is to express support for funding of a proposed water tower in the City of Union. The water tower is needed to support water reliability and create redundancy within the Union Industrial Air Park, directly adjacent to the Dayton International Airport. The City of Union has been proactive in their approach to improving infrastructure in the industrial park to address growth, support jobs and ensure continuous and efficient services for all in the area. These actions have provided significant economic benefits by making development more attractive and competitive in the Montgomery County area, resulting in the potential for an increased local tax base and job opportunities for our residents.

To date, the City of Union has created approximately 6,000+ Montgomery County jobs in the Union Industrial Air Park while investing approximately \$40 Million in infrastructure improvements. We encourage your consideration for support and funding opportunities of the proposed water tower to enhance infrastructure features for the region. These will aid in recruitment and assist in competing for companies to locate in the area. Infrastructure projects, such as this, strengthen developmental capabilities and economic positions of businesses in the region. This project is essential for the continued growth of job creation and overall economic development, and we strongly support the needed water tower that will benefit our region.

Any questions or concerns, please contact me at 937-475-8093 or abyers@dacc.org.

Sincerely,

Amanda Byers
Director, Talent & Policy
Dayton Area Chamber of Commerce
